Professional Experience

Zopping

Bengaluru, Karnataka

Software Development Engineer I

May 2025 – Present

- Architected and maintained a library of **20+ scalable, reusable React components** for Admin and Consumer (Storefront) platforms, ensuring consistent UX and reliable state management across high-traffic workflows for **50,000+ daily active users**.
- Collaborated in designing **15+ RESTful APIs** end-to-end, defining request/response contracts with the Backend team and building complex form workflows with validation and error handling; conducted unit and regression testing, **cutting production defects by 30%**.
- Performed **Root Cause Analysis (RCA)** on production issues using **Grafana** logs, resolving frontend-backend data mismatches and **reducing recurring UI defects by 25%**, cutting mean time to resolution by approximately **40%**.
- Shipped **30+ frontend features** end-to-end and closed **50+ critical bugs**, maintaining high code quality and stable releases with a **<0.5% post-release defect rate**.
- Boosted frontend performance by eliminating unnecessary re-renders (**20% reduction**) and cutting time-to-interactive by **15–20%**; containerised the development environment using **Docker**, refactored legacy UI code, shrinking bundle size by approximately **18%**.

ZopSmart

Bengaluru, Karnataka

Software Development Engineer I

Nov 2024 – Apr 2025

- Built and refined **8+ reusable UI components** using **React** and **JavaScript**, reducing component duplication by approximately **30%** across the codebase.
- Integrated **5+ RESTful APIs** into frontend views, ensuring reliable frontend-backend data flow and reducing data-sync errors by approximately **20%**.
- Identified and fixed **15+ UI and functional bugs**, improving application stability and user experience while achieving a **95%+ bug resolution rate**.

Projects

Audio Insight GitHub | Live Demo

React, Node.js, Express.js, MySQL

- Built an AI-powered platform that generates multilingual transcriptions and summaries from uploaded audio files using Gemini AI and AssemblyAI.
- Integrated real-time audio-aware Q&A using Socket.IO and implemented secure REST APIs with JWT authentication and role-based access control.
- Designed and developed the complete application independently using React, Node.js, Express.js, and MySQL.

The Artline GitHub | Live Demo

React, Node.js, Express.js, MongoDB

- Developed a full-stack MERN artwork marketplace with authentication, CRUD operations, role-based access, favorites, and shopping cart functionality.
- Designed responsive and accessible user interfaces using React and Chakra UI, backed by secure Express APIs and MongoDB.

Education

Masai School

Full Stack Web Development

Remote

Aug 2023 – May 2024

Delhi University

Bachelor of Arts

Delhi

Jun 2020 – Aug 2023

Technical Skills

Languages: JavaScript, TypeScript, Java, HTML5, CSS3, SQL

Frontend: React.js, Next.js, Redux, Tailwind CSS, Bootstrap, Chakra UI

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL

Tools: Git, GitHub, Docker, Postman, VS Code

Core Concepts: Responsive Design, Performance Optimization, Code Splitting, SSR, SSG, State Management
